

## Overguard

Overdrive's **Real Time Location System** is able to identify and track the exact location of equipment, other objects and people in real time, usually within the premises or other contained areas. It delivers precise visibility of critical assets—supply chain, manufacturing, and human.

For **transportation and logistics** companies, this means having end-to-end visibility and traceability of all containers, pallets, and packages.

For **manufacturers**, it enables intelligent management and flow of all critical assets, whether in the facility or at a sprawling storage yard.

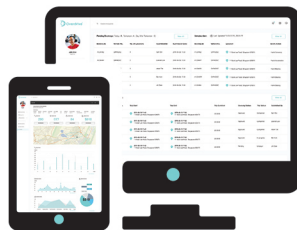

In **security and safety operations**, it means controlling employee access, and ensuring they do not linger in hazardous areas beyond safety requirements.

Our solution is designed to be low cost and ultra-low power so you can prioritize safety and business efficiency over commercial.

### Key Benefits Of Real Time Location System

**An improved safety climate and reduction of workplace related accidents**

**Full analytics on your entire operation in real time.**

**Use the right resources at the right time**

**Exact Location Tracking**

**Lower Cost of Implementation**

**Easy Set up and Rapid Implementation**

# Usage Scenarios

Real Time Location System can be used in numerous logistical and operational areas:

## Emergency Evacuation

Quickly and automatically account for all staff after or during an emergency evacuation

## Movement Tracking

To track employee movement within a location or even soccer players during a game!

## Asset Tracking

Locate and manage assets within a facility, such as finding a misplaced tool cart in a warehouse.

## Worker Safety

To alert user on any man-down incident.

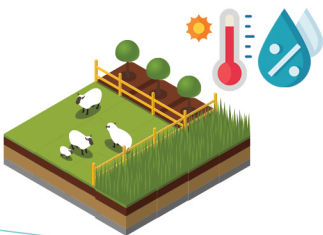

## Combine Identity of Assets

To combine identity of multiple items placed in a single location, such as on a pallet.

## Environmental Monitoring

To assess environmental conditions and trends in soil, water and air.

## Vehicle Tracking

Notify new locations when the vehicle has departed.

## Smooth Operation and Security

To maintain proper staffing levels of operational.
