

OverWheels

Smarter Fleet Solutions

Overdrive's fleet management provides more than just simple GPS tracking. We offer full fledged smart fleet solutions for every industry, every vehicle with industry-leading management reports that ensure fleet security, better maintenance and greater profitability.

Benefits

Optimise your fleet's operation with OverWheels.

Reduce Fuel and Operating Costs

Manage bad driving habits by monitoring your drivers' speed, excessive idling and route

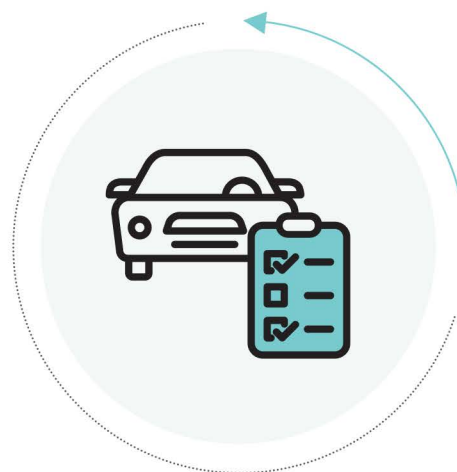

Improve Productivity

Plan effective transport routes with faster trip times and fewer deviations.

Increase Safety

Access to key safety metrics for your drivers such as speeding, harsh braking and harsh

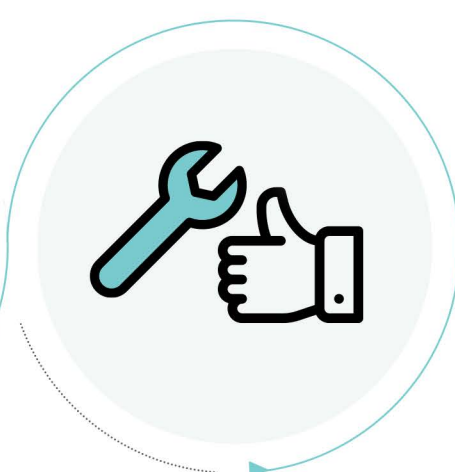

Optimise Vehicle Maintenance

With Overdrive's smart intelligence, you can have a full report of your driver's driving behaviour and increase vehicle life span.

Expand Your Business

We take care of your fleet requirements, leaving your team with more time to grow your logistics operations efficiently.

Free Installation

No upfront set-up costs, just monthly subscription fee.

Key Features and Add-Ons

LIVE GPS Tracking

Track the exact location and activities of your fleet of vehicles in real-time, wherever and whenever you go, whether it is on your laptop or mobile phone.

Predictive Maintenance

We keep track of your vehicles health and able to predict when they will need a service maintenance through mileage usage, engine usage and driver behaviour reports.

GeoFencing

Map Points of Interest (POI) and geofences for your business and monitor how often your vehicles travel to and spend time at these places, allowing you to manage resources better.

Cloud-Based Solutions

With our Software as a Service Platform, you have the ability to access all of your data no matter where you are. All your valuable data will be backed up timely and securely.

Real-Time Drivers' Alerts

Improve drivers' behaviour, reduce fuel and vehicles maintenance costs by receiving real-time alerts when our system detects bad driving behaviours.

Route Planning

With pre-defined routes and off-route notifications, you can plan the most efficient routes for all your vehicles while improving your fleet usage simultaneously.

Immobilization Of Vehicles

Prevent unwanted driving, with a start inhibit that safely and effectively restricts vehicle start up on demand.

Fuel Monitoring

Monitor exactly how much fuel each vehicle and driver use in order to efficiently manage your fuel expenditure and prevent possible theft.
